Handling Workplace Dilemmas (Harassment, Sexual Harassment & Violence)

This workshop provides supervisors and managers with strategies that will assist them in managing difficult workplace situations. Prevention, awareness and action are the focuses of this presentation. Much harassment and violence can be prevented by a strong organizational culture. When incidents do occur, awareness is crucial in identifying a problem early so appropriate action can be taken.

Participants will have an opportunity to review laws and relevant company policies that relate to these topics. There will also be opportunities to talk about the role of a company's harassment policy, discuss particular case studies and have questions addressed.
