After registering, you will receive a confirmation email containing information about joining the webinar.

Enhancing Management of Remote Employees

In an increasingly technologically driven world, the need for telecommuting and remote teams continues to grow. These new work structures require new skills to ensure healthy and effective work environments. COVID-19 has accelerated this trend, leaving many managers and supervisors racing to adjust to these new norms.

This session will look at how to build relationships, maintain engagement of employees, and effectively manage performance while working remotely.
